

Brent Kastor
Transportation and Logistics Graduate Student
Program: Masters of Transportation & Urban Studies

Hometown: Jacksonville, Florida

What are some of your hobbies? Music, Jogging, and Triathlons.

How did you become interested in your field of study? I have a certain desire for maps and enjoy staying abreast to the latest advances in technology, so getting involved with GIS was a natural choice for me.

What do you like to do in your spare time? I like to stay active (cycling / jogging) with my wife, 13 year old son, and 10 year old daughter. I recently completed the Bike MS – a 150 mile+ bike ride to help end Multiple Sclerosis. I enjoy following Chicago Cubs baseball, Chicago Bears, and Jacksonville Jaguars football.

What are your goals or future plans? One of my primary goals is to be positioned as a leader in Geographic Information Systems (GIS) for a Fortune 250 company.
