

Hally Turner

Transportation and Logistics Graduate Student

Program: Certificate in Transportation & Urban Systems

Hometown: Leadville, Colorado

How did you become interested in your field of study? I started in transportation as an intern after completing public health. I have a lot of opportunity to work towards meaningful change in my community.

Why did you pick NDSU? I choose NDSU based on the availability of online courses.

What do you like to do in your spare time? I travel whenever and wherever possible. I have been to all seven continents.

What are your goals or future plans? I am looking for more technical knowledge in transit planning. With a background in public health, aspects of my jobs prove to be more challenging. More formal training in transportation systems will help me become a better employee.
