(EXCUSED 57.1 %, W/O PERMISSION 42.9 %)

# Alco-Sensor FST

The Alco-Sensor FST is the newest instrument in the Alco Sensor product line. Offering both direct and passive sampling, this instrument produces fast reliable, accurate results in a package that is designed so that the operator has maximum control over the subject during sample collection..  
Weight : 7.5oz.

# PharmChek®

## Drugs of Abuse Patch

- *Increased window of detection*
- *Acts as a deterrent to drug abuse*
- *Detects Parent Drug and Drug Metabolites*
- *Variable Removal Date*
- *Quick Application & Removal*
- *No Urine Collections*
- *No Sample Substitution*
- *No Sample Dilution*
- *Screens for: Marijuana, Cocaine, Opiates, Amphetamine/Methamphetamine & PCP*

# PharmChek®

## Drugs of Abuse Patch

PharmChek® drugs of abuse patch, uses sweat as the specimen source. It provides an alternative to urine collection and offers a number of advantages. Because the sweat patch is worn on the skin for up to 7 days to 10 days, it not only acts as a deterrent to continued drug use, but also increases the window of detection to include any period when it is worn. With sweat testing - unlike urine - the parent drug as well as the drug metabolite can typically be detected. Therefore, it is easier to identify which drug was actually taken. The following are the advantages of the PharmChek® drugs of abuse sweat patch.

# The Panel-Dip Device

- The single and multi-drug configurations test for any of the following analytes:  
Methamphetamine,  
Amphetamine, Barbiturates,  
Benzodiazepines,  
Buprenorphine, Cocaine  
Metabolites, Marijuana (THC),  
Methadone, Opiates (300/2000  
ng/mL cut-off), Oxycodone,
