

Mingwei Guo
Transportation and Logistics Graduate Student
Program: Logistics and Supply Chain Systems

Hometown: Jinan (China)

What are some of your past/current research interests? Previously I was working on data analysis and company analysis of listed companies for both in the U.S. and China. In the future I will conduct more research on Ecological Environmental Compliance, Traffic Safety, and Supply Chain Management.

How did you become interested in your field of study? After I finished my Master's Degree in Finance I found that my skill tool box is not enough to have knowledge of what is going on around the world. I wish to dig more into Supply Chain and Transportation field to explore more excitement from some different aspects of economy and in the meanwhile to find a potential solution for the ecological problems occurring in developing countries.

What do you like to do in your spare time? I play basketball and do some daily workouts in my spare time. If time permits, I am always on road trips to enrich my experience and to learn more about different cultures and food. Finance Management is my other hobby. I like to form my own portfolio and compare them with the famous capital managers.

What are your goals or future plans? My goal here is to find a connection from my previously study to transportation, logistics, and supply chain management. I currently have no future plans for the moment because I'm still working on enriching my skill tools to find a future plan.
