

The Future Mobile Client - Inspection

IT Workshop – June 18, 2009

Mobile Client - Definition

- ▶ A single field application that facilitates
 - Inspections
 - Interventions - Reviews / Audits – on or offsite
 - Enforcement / Follow-Up Actions
 - Crash Data collection

- ▶ Connectivity – will work online or offline
 - Allows users to work offline and later sync with the central system / enterprise database when connected
 - Provides real-time carrier, vehicle, and driver information or validation if connected

Inspection and Review Process - Issues

▶ Connectivity

- One user name and password
- Available on or off-line

▶ Integration / Consolidation of Applications

- No need to determine which application to use when

▶ Data Quality

- Standardization, consistent edit checks

▶ Flexibility

- Standard interface / data exchange capability for use with other state systems

Other Drivers

- ▶ New DOT security requirements
- ▶ Federal Desktop Core Configuration Standard
- ▶ Incorporate functionality needed for the CSA 2010 initiative

www.fmcsa.dot.gov/csa2010/

Mobile Client Conceptual Overview

Mobile Client Application

Shared Functions and Services

- Log On/Log Off
- Data/File Management
- Uploads/Downloads
- Administrator Settings
- Manager Settings
- User Settings

Inspection Module

Includes functionality of Aspen, ISS, PIQ, and CDLIS Access (for license queries for one or two drivers)

Intervention / Audit Module

Includes functionality of CAPRI and CDLIS Access (for license queries for small or large batches of drivers)

Enforcement / Follow-Up Module

Includes functionality of CaseRite and UFA

Crash Module

Includes functionality for the collection of crash data

Where are we at today?

- ▶ Started with a focus on Inspection functionality
 - Formed a working group with 16 states, including 2 border states represented – meet monthly and at CVSA
- ▶ Now adding a focus on Safety Audit functionality
 - Including what is needed for the New Entrant rule
- ▶ Also adding a focus on Intervention functionality
 - On and off-site reviews
- ▶ Working groups are being formed for both of these

Inspection Discussion Summary - 1

- Format and generation of inspection report number
- Manager configuration – user levels
- Internet connection one time for user profile information
- Add Carrier DBA name in addition to Legal name
 - Suggestion to also add the full driver middle name
- Add Carrier Physical address in addition to Mailing address

Inspection Discussion Summary - 2

- Interstate Indicator for the Carrier
 - Users need to be able to select multiple possible options for the particular carrier responsible for the vehicle
- USDOT numbers assigned to Intrastate carriers?
- How handle inspections with no DOT # when should have one
- Ability to Collect Multiple Shippers information

- Shortcuts for commonly cited violations / Repeat function
- Company # / Citation # / license plate # - field review – size, type, use
- State-specific violations – mapped to Federal violations
 - Expedited action violations
- Special study fields versus local fields

- Discussion of “fixed” versus “roadside” inspection locations
 - Need to make the designation more clear and to add “terminal” as an option
- Discussion of actual inspection process – check driver information first
- Discussion of various state optional fields, and those that may be useful for the client

- ▶ If a unit is conducting a post-crash inspection, collect enough data to determine if the correlating crash was a reportable crash
 - If ticket for a moving violation was issued, then a note on the inspection reminding the company that a drug test may be required according to the FMCSR's
- ▶ Additional fields to consider
 - GPS location, Accident Report #, OOS location, CDL Checked
- ▶ Ability to select and print inspector notes as part of the report, rather than on a separate page

- ▶ Ability to select a default inspection level
- ▶ Consider CVSA Sticker log utility
 - Used by CHP and possibly other states to track CVSA sticker use and accountability

- ▶ General comments / feedback
- ▶ Please submit any additional feedback to:
