- **Welcome and Introductions**

Andrew Miller started the meeting and turned it over to Bob Scopatz to run due to a conflict. The group introduced themselves.

2. FMCSA Analysis Division Update (Bill Bannister)

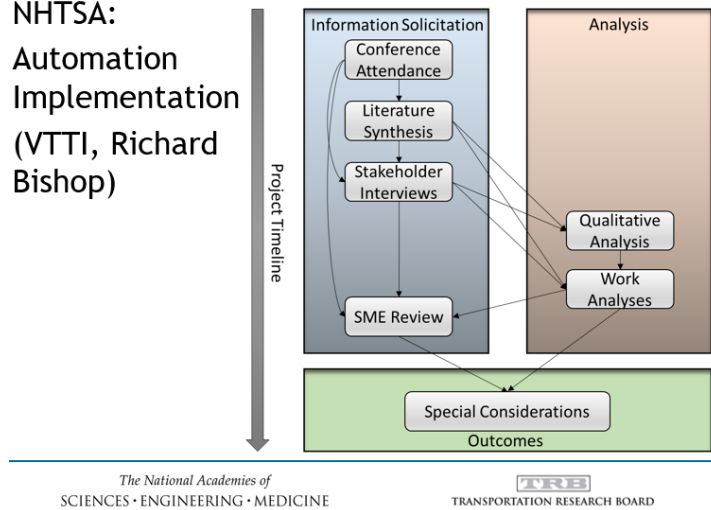

Bill Bannister presented a review of upcoming and active projects. He reviewed crash data, employment trends (e.g., oil fields), A&I Online and the Tableau visualization module, the RYG map of data quality, Carrier Intervention Effectiveness Model recidivism study using survival analysis, and the updated Data Q's manual.

3. Impairment Data Needs (Ryan Smith, NTSB)

Ryan presented on the NTSB's most wanted list and focused on the need for data on impairment in crashes involving large trucks and buses.

4. Automation Implementation (NHTSA & VTTI)

NHTSA:
Automation
Implementation
(VTTI, Richard
Bishop)

5. Group Discussion and Research Needs Statements

The following research needs statements were discussed

- **Retroreflective materials:** There are no minimum standards and no maintenance requirements. Jeff Muttart will take this topic on.
- **Under-ride:** This is a joint RNS with other related committees. Jeff Burns will take this topic on.
- **Suicide-by-truck:** Ron Knipling will take this topic on.
- **Drugs:** Ryan Smith will take this topic on.
